

COMP BIGFOOT PEDAL

Push off, drop in, or ride across town, the Ritchey Comp Bigfoot gives you control, confidence, and pedaling efficiency in a lightweight pedal design. Crafted from reinforced nylon, Ritchey made these pedals to be durable as well as affordable. Chromoly steel axles and a concave 105x108.5mm platform with a 18.5mm depth ensure strength and stability, while nine metal pins on each pedal face guarantee the best grip. Weighing in at a modest 360 grams per pair, the Comp Bigfoot can hold their own against heavier anodized aluminum cousins. Available in BA Black or Mojave Sand for your aesthetic preferences.
