

ZONDA

ALL ROAD CARBON

CONCEPT

A multi-terrain wheel optimized for performance across road and light gravel, providing adaptability for diverse riding conditions and styles, a complete all-road solution.

Engineered for strength and reliability, it reflects the standards of Campagnolo.

NEW SIGNATURE BRANDING CONCEPT

Rear

Front

A new approach to product branding has been introduced. On the rear wheel, the Campagnolo logo is positioned on the drive side, aligned with the valve area, while on the front wheel the iconic Winged Wheel emblem is placed in the same valve-side position. On the opposite side, the two graphics are mirrored, with their order reversed.

This layout ensures that, regardless of the viewing angle, both the Campagnolo brand and the iconic Winged Wheel emblem remain clearly visible, reinforcing brand recognition and creating a distinctive visual identity for the bicycle.

RIM SPEC

Undrilled rim bed
Hooked rim
2 WAY FIT

Uni-directional carbon fiber
C-LUX finish

ASTM 2

IW 25mm
30mm external width
Compatible tires from 29 mm to 60 mm

50mm rim height

XDR FWB

CUP & CONE

G3 – 2:1 lacing pattern
7 x Triplets
21 spokes with 2 / 1,6 / 2 section
Straight pull tapered, circular-section spoke

DETAILS

Although it is not positioned as a premium-priced product, the technical solutions, engineering approach, and level of attention to detail fully reflect Campagnolo's standards.

Every component has been developed with the same commitment to quality, performance, and riding experience that defines the brand, ensuring precise operation, reliability and an outstanding ride feel for every cyclist.

FINISHING

LASER ETCHING

SCREEN PRINTING

Two distinct branding finishes are featured on the rim. The Zonda logo is applied through screen printing, using a small, understated dark-grey graphic positioned prominently in the foreground. All remaining graphics are created through laser finishing.

As with every Campagnolo product, the focus remains on enhancing and celebrating the material itself. The graphics are integrated with a refined, understated approach, highlighting the carbon surface and craftsmanship rather than covering them, in true Campagnolo style.

KEY PRODUCT ESSENTIAL

ALL-ROAD PERFORMANCE

With its 25 mm internal rim width and 50 mm profile, this wheelset is a true all-road solution, equally at home on high-performance road bikes and long-distance endurance frames. The wide internal channel is optimized for modern (big) size slick tyres, delivering the perfect balance of speed, comfort, stability, and efficiency across a wide range of riding conditions.

VERSATILITY

Whether used for pure road riding, endurance adventures, or all-road applications, it represents a reliable and future-proof choice for riders seeking a single wheelset capable of doing it all.

ENTRY LEVEL ONLY IN PRICE

Premium materials, refined finishes, and advanced engineering solutions make this wheelset “entry level” only in terms of its price point. Every aspect of its design has been developed to deliver performance, quality, and riding characteristics that exceed expectations and outperform many competitors within the same category.
